Model: TPS-PHA (Pneumatic Height Adjustable)

4 WB Two Pneumatic Height Adjustable Legs

The Teacher's desk consist of two pneumatic columns that are 15-gauge steel. Tube dimensions are as follows: outer tube = 2.75" x 2.75", middle tube = 2.5" x 2.5" and the inner tube = 2.25" x 2.25". The guidance system in these columns uses a roller cage design. This roller cage uses steel roller bearings as an interface between the steel tubes of the legs. This design allows for smooth adjustments between the moving parts of the columns with less friction. The stainless steel bands which travel the length of the base, synchronize the 2 columns ensuring that both columns lift evenly together every time. Columns consist of T Foot sets that have passed all BIFMA x5.5 tests and come standard with four dual wheel locking casters and 2.5" Grand Hank glides. The top frame is a 15-gauge, fully welded steel tube that is 1" x 2". The top frame is secured to the top with provided screws. There is a plastic handle that attaches to the bottom of the top, 1" from the edge so it is easily accessible to adjust the table to different heights.

5 WB Pneumatic Height Adjustable Handle

The handle control is unique for pneumatic height adjustable tables in that it is flush mounted underneath the table. This design hides the mechanism as most teachers appreciate this feature.

6 Pencil Drawer

The rounded edge pencil drawer is 1.4"h x 22.8"w x 7.3"d. It is designed to be shallow so that the teacher will not bang their knee while sitting next to it. It's perfect for holding dry-erase markers, cleaning rag, note pads and remotes. The drawer does not lock.

7 Legrand Access Box w/ 3 AC, 2 USB-A, 1 USB-C, 20ft. Power Bar

The Legrand Table Top Access Box with mounted power strip in the bottom of the box is essential to the design of the Teacher Presentation Station. It allows the teacher to -

- Come to the presentation station, take out their laptop, and plug their AC (brick) power supply directly into the Access Box from the top. The AC brick can rest in the empty area of the power strip or Legrand box.
- This "top-loading" design prevents teachers from having to get on their hands and knees to plug their laptop into a power source and manage the cables from under the table.
- The closed lid has a gap filled with soft paint-like brush bristles to organize and space the cords coming up from the box and onto the table.
- The Access Box comes in Black or White case.

8 WB Metal Modesty Panel with Cable Management Trough

The perforated metal Modesty Panel is 12"H x 35" W and doubles as a secondary cable management trough. Perfect for storing a doc camera power supply then plugged into the power strip in the LeGrand Box. Also included is a Velcro Cable Management Kit. Note- The perforated holes are not only decorative, but can serve to zip tie loose cables. All in all, the design maximizes an uncluttered table top hiding cables and power supplies as much as possible.

Velcro Cable Management Kit

9 WB Four Locking Casters

The Teacher Presentation Station comes standard with dual wheel locking casters, but WB also includes a 4 set of Grand Hank Glides as the other option.

Standard Features: _____

2.5" Grand Hank glide (-HG)

Dual wheel locking casters
